

Visualization Tools

In this tutorial, we will offer an introduction to all of the visualization methods and the tools that they come with so that you can identify trends in your data more easily.

Brief Summary

Open up your project in the projects tab and click the blue “Visualize” button. This will open up a visualization for your project. Here, you can click on the tabs to view the different types of graphs. If we click on the “Summary” tab, we will see an overview of some of the important data related to your project.
